

Angioplasty

Department Director:

Dr. Yitzchak Hertz
Director of Catheterization Laboratory or Cath Lab
Specialist in Cardiology and Internal Medicine

Head Nurse:

Mrs. Shoshi Zamir,
RN/BA

General

The angioplasty unit performs all forms of angioplasty procedures: coronary, left, right, suction of clots, balloon, implantation of stents, and evaluation of coronary ultra-sound. Patients arriving with serious blockage undergo angioplasty immediately upon arrival, at any hour of the day. Information on the angioplasty procedures is preserved in the computer database, and can be

viewed at any time and saved to a disk. In 2007, the unit performed angioplasty procedures on 750 patients.

The unit treats members of all health funds and privately insured patients.

Hours for Medical Rounds

Every day between 9:00-12:00.

Times for receiving medical information

Following Angioplasty.
