

Cardiology Department

Department Director :

Dr. Ron Lior, PhD
Specialist in Cardiology and Internal Medicine

Head Nurse:

Mrs. Parchiya Hilu

General

Most of the patients who arrive in the emergency room with non-urgent cardiac problems are hospitalized in the Cardiology Department. This department allows us to identify patients in need of tests and interventions on the day of their arrival or at most, the next day, thus streamlining and expediting the procedures required during their stay. In addition, the patients are cared for by professional staff experienced in caring for patients with heart diseases.

The department has 18 rooms with 2-3 beds per room.

In 2007, over two thousand patients were hospitalized in the Cardiology Department.

Beginning in the spring of 2009 the department is undergoing a process of renewal and expansion. This is possible thanks to donations, including a generous grant from the Conference on Jewish Material Claims Against Germany.

Senior Medical Staff

The medical staff includes two professional cardiologists and four internists.

Hours for Medical Rounds

Every day between 9:00-12:00.

Times for receiving medical information
